

Biography

GitHub" is a collaborative software development platform that focuses on hosting projects using the Git version control system. It was founded in 2008 by Chris Wanstrath, Tom Preston-Werner, PJ Hyett and Scott Chacon. The idea arose while they were working on a startup project, where they encountered difficulties sharing and collaborating on the code.

when it was created

The development of the GitHub platform began on October 19, 2007. The site was launched in April 2008 by Tom Preston-Werner, Chris Wanstrath, P. J. Hyett and Scott Chacon

all about github

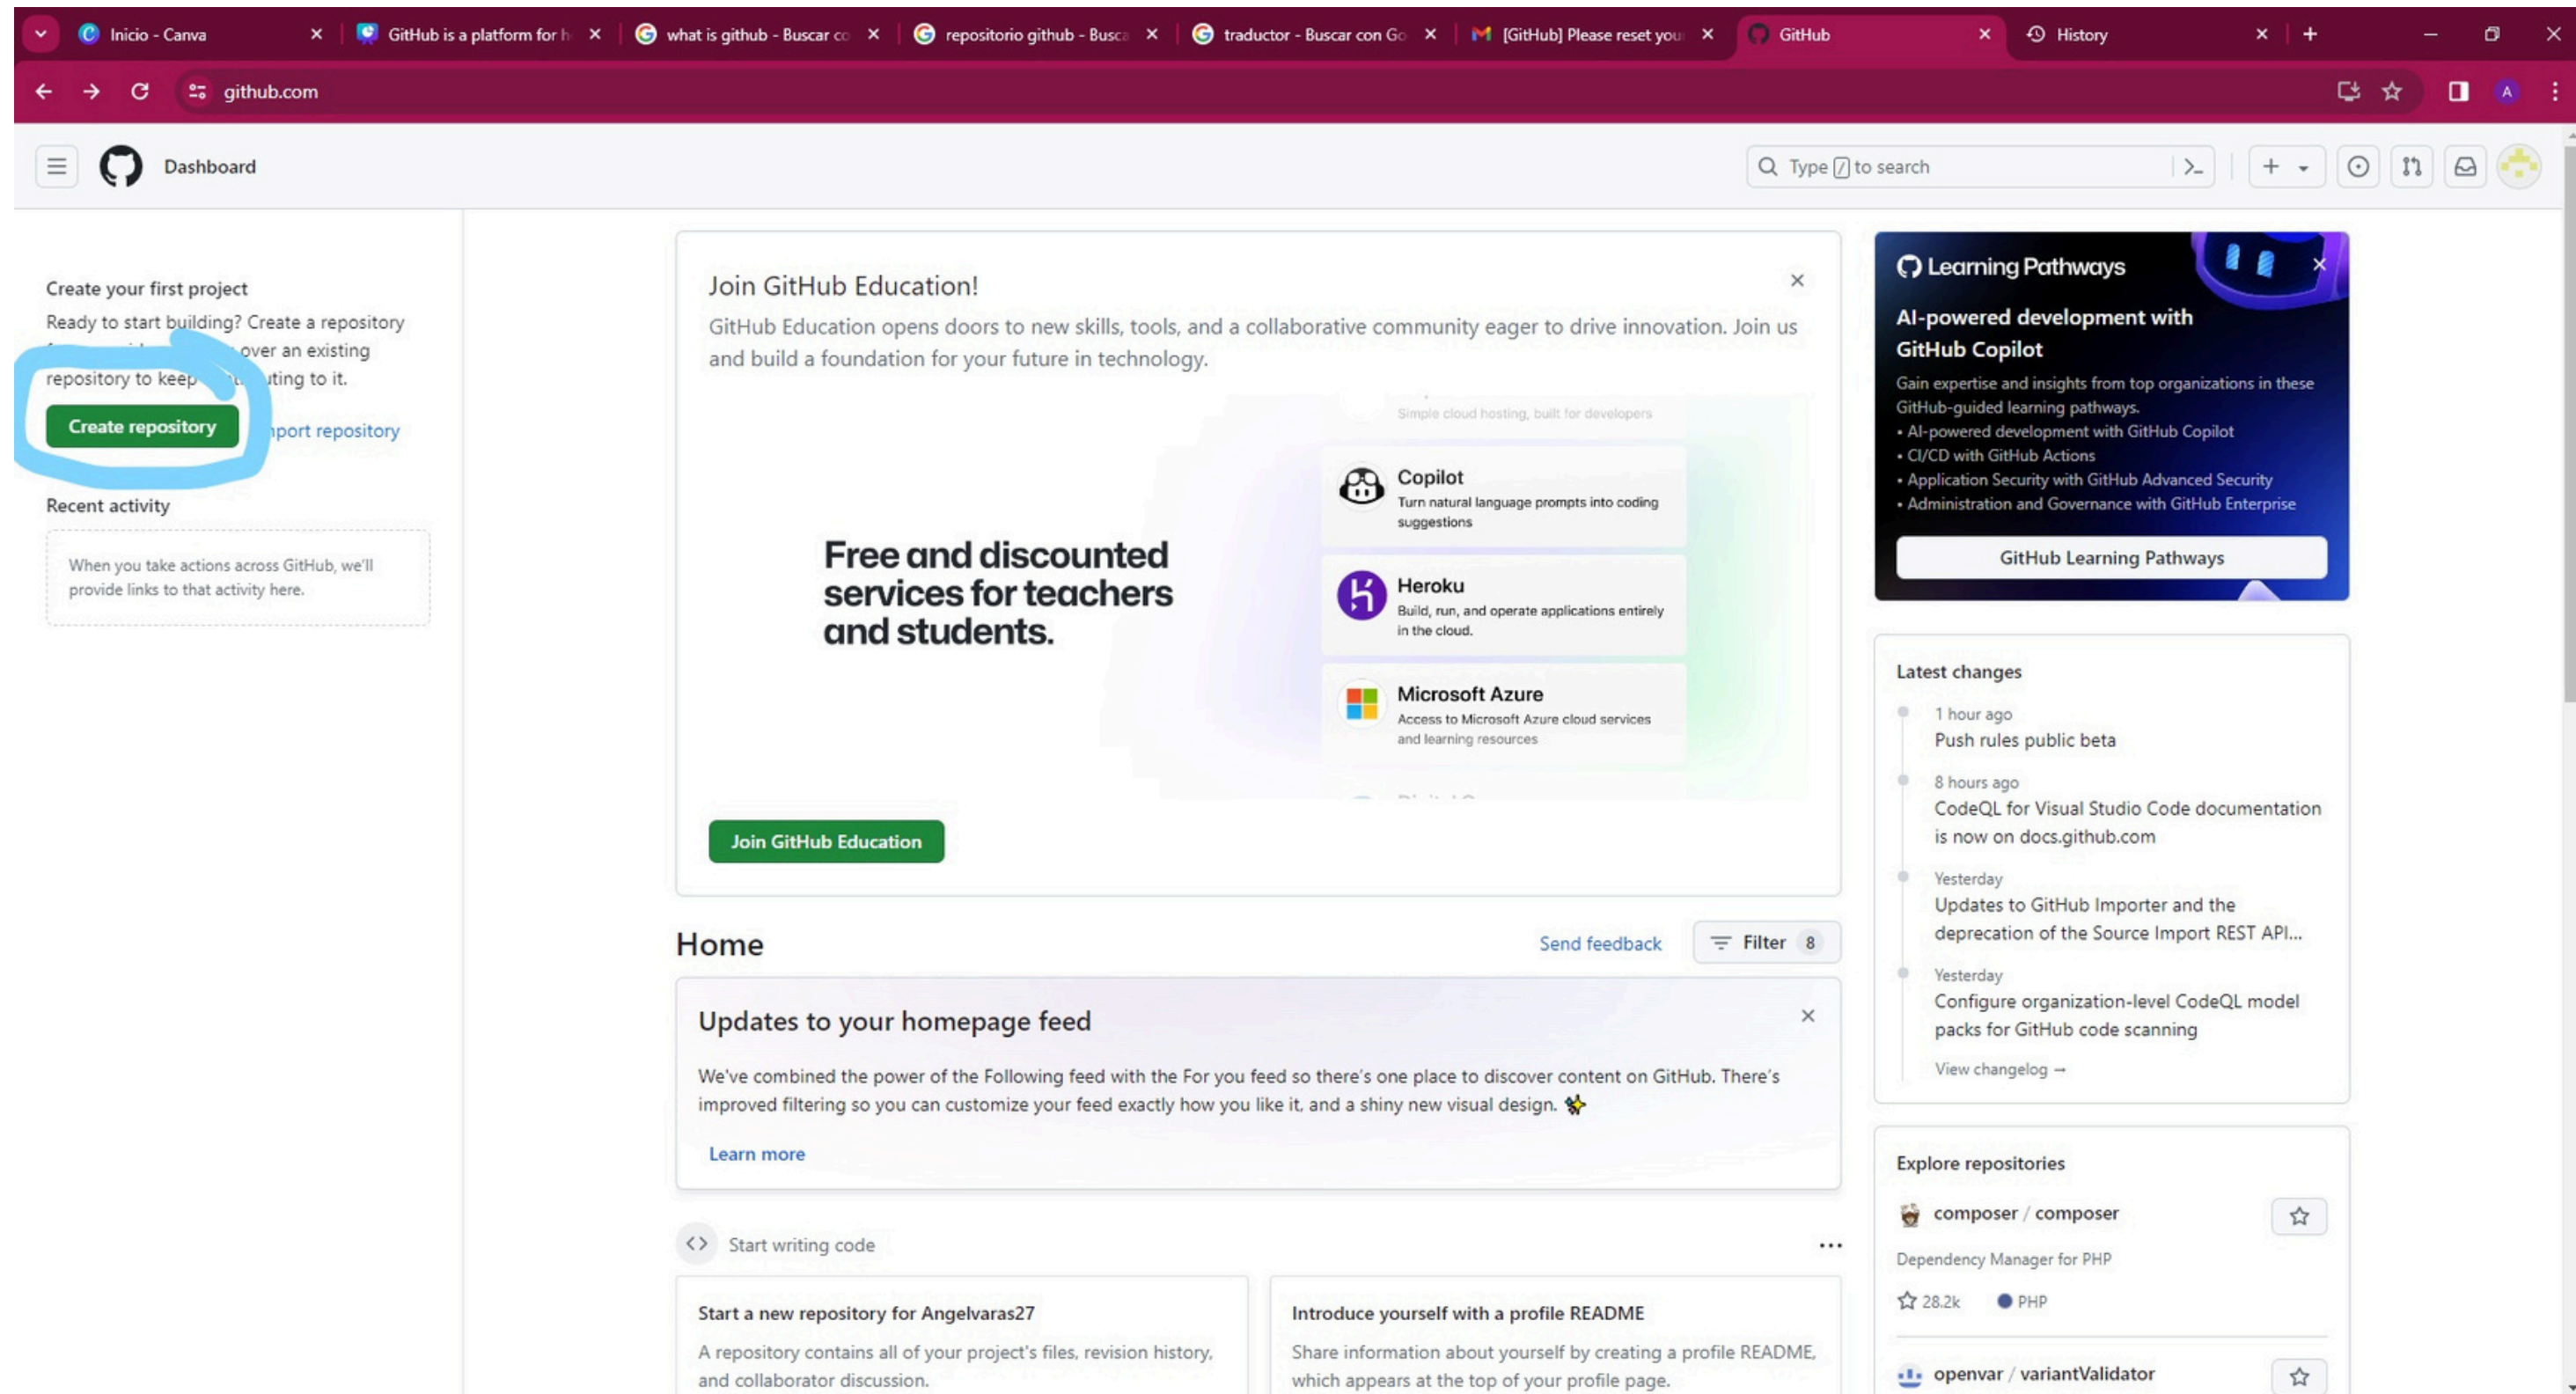

what is it

GitHub is a platform for hosting code . It allows you and others to collaborate on projects from anywhere. This lesson will teach you the fundamentals of GitHub, such as repositories, branches, commits, and pull requests.

how to make a repository

first of all click at “create a new repositit”

Now complete the white spaces that are there and choose your templates and then press “create repository”

New repository

Type to search

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere?
[Import a repository.](#)

Required fields are marked with an asterisk (*).

Owner *

Repository name *

Angelvaras27 /

Great repository names are short and memorable. Need inspiration? How about [super-succotash](#) ?

Description (optional)

☒ Public

Anyone on the internet can see this repository. You choose who can commit.

☐ Private

You choose who can see and commit to this repository.

Initialize this repository with:

☐ Add a README file

This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore

.gitignore template: None

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license

License: None

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

You are creating a public repository in your personal account.

Create repository

now read the statements that github give you for dowloading your files

Como Crear un Repo

+

github.com/Angelvaras27/ggg

Set up GitHub Copilot

Use GitHub's AI pair programmer to autocomplete suggestions as you code.

Get started with GitHub Copilot

Add collaborators to this repository

Search for people using their GitHub username or email address.

Invite collaborators

Quick setup — if you've done this kind of thing before

Set up in Desktop

or

HTTPS

SSH

https://github.com/Angelvaras27/ggg.git

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# ggg" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/Angelvaras27/ggg.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/Angelvaras27/ggg.git
git branch -M main
git push -u origin main
```

...or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

Import code

ProTip! Use the URL for this page when adding GitHub as a remote.

then choose the file you will put in github
